

A great opportunity has arisen for an associate to join our busy award-winning multidisciplinary practice in the picturesque old English University city of Durham in the north east of England. Durham Family Chiropractic is a vibrant practice, established for over 25 years and proud to hold an excellent reputation amongst our local community and businesses. We currently hold the PPQM and CMQM awards from the Royal College of Chiropractors and are one of approximately 50 clinics in the UK who hold both awards.

We are looking to replace one of our practitioners who has decided to work closer to home, therefore we now have approximately 30 hours per week available.

The associate position would suit an experienced chiropractor or an exciting new graduate with the right skills and attitude. We are looking for a dedicated, professional team player with excellent communication skills who can learn, re-learn and adapt.

Our large practice consists of four treatment rooms and a spacious waiting area. The clinic has a continual stream of new patients, averaging 20 per week, enabling you to quickly build a busy schedule. Many of our patients have been with us for over 20 years and see us regularly.

Our team consists of four Chiropractors (two part time and two full time), a sports, remedial massage and lymphatic drainage therapist, a traditional Chinese medicine Acupuncturist, a clinic manager and two chiropractic assistants.

The clinic takes an evidence-based, outcome-driven approach to care while still respecting patient preference. We utilise Care Response to gather objective outcome data allowing us to track progress and patient satisfaction more closely and therefore maximise patient potential. We are a paperless clinic utilising iPad for note taking with the Jane clinic diary and booking system. We also have state of the art patient education technology which can be delivered using the iPads via the 50-inch TV's in each treatment room. There is also access to the Rehab my Patient online service.

The services we currently provide are chiropractic, traditional Chinese acupuncture, taping, sports and remedial massage, lymphatic drainage, and shockwave therapy. We will also be offering in-house diagnostic ultrasound in early 2021. The techniques practiced by our chiropractors are diversified, McTimoney, Advanced BioStructural Correction (ABC), soft tissue/fascial work and MSK exercise rehabilitation.

The Principal Chiropractor and Clinic Director is a member of the BCA, registered PRTS tutor and a fellow of the Royal College of Chiropractors Orthopaedics, Rehabilitation and Exercise faculty and can take you through the process of completing the requirements for full membership of the BCA (if required). Your practice style will be respected providing it aligns with the clinic mission and vision.

Durham City and the surrounding areas are a great place to live and work, blending city life with picturesque countryside. There is great leisure and entertainment in the city, with Newcastle and Northumberland being a stone's throw away. Located on the East Coast mainline, Durham boasts excellent connections by rail being 15 mins from Newcastle, 45 mins to York and only 2 hrs. 50 mins from Central London.

At Durham Family Chiropractic we believe in a good work-life balance and the clinic hours of the new associate can be flexible. We will have approximately 30 hours per week over 5 days (Mon-Fri with Saturdays open if desired).

What we will provide:

- A steady stream of new patients
- In house PRT
- First Class mentorship from an experienced team of Chiropractors and other practitioners
- Support from an exceptionally experienced clinic manager and reception team
- Support with professional fees in the first year (if appropriate)

If you are interested in joining a well-established vibrant practice, then please contact us on info@durhamchiropractic.co.uk.
