Vestibular Migraine: Diagnosis and Treatment with Jake Cooke FRCC

Webinar Outline

This event will cover diagnosis and treatment of vestibular migraine, one of the most common causes of dizziness; it may even be the most common form of dizziness.

Vestibular migraine is under-diagnosed, reduces quality of life and causes a high degree of suffering. Most patients with chronic dizziness will develop neck pain and stiffness. As a result they turn to a chiropractor for help. If the cause of their neck stiffness is missed, the treatment of their neck is likely to fail. We need to treat the migraine AND the neck stiffness to help improve their quality of life and reduce suffering.

Learning Outcomes

- Understand how vestibular migraine presents and how it differs from other leading causes of dizziness
- Understand how to make a vestibular migraine diagnosis
- Understand what a treatment plan consists of and what should you and patients expect recovery to look like

Speaker

Dr Jake Cooke is a diplomate of American Chiropractic Neurology Board and has a Masters in MSK Neuroscience. He's the current Chairman for the European Academy of Chiropractic's neurology special interest group. His goal is to teach how neurology can be used to improve diagnosis and treatment. His focus is on chronic pain and dizziness/balance disorders.

APRIL 2023

Wed 5th

19:00 - 20:00
